

## Vacancy for Environmental Permitting Manager

*The Environmental Permitting Manager will be responsible for the provision of planning and permitting for Zebec Businesses, and will provide expert Engineering input into project development.*

Zebec is a progressive and dynamic company working within the renewable energy sector in the UK. With projects across the biogas, hydro, heat recovery and recycling markets, exciting new opportunities are our core business.

We are looking for a technical / project manager to join our expanding business who will provide active support, knowledge and experience in developing renewables projects, helping to exceed our clients' expectations when it comes to solutions delivery.

You will be qualified to degree level in an engineering or scientific discipline and may currently be working as a process engineer or as an environmental consultant, manager or regulator. Ideally you will have some relevant industry experience delivering medium-sized projects. As such, previous involvement with energy from waste, biomass or biogas projects would be a distinct advantage, although not essential.

In order to deliver the best possible service to our clients you will need excellent communication skills, be creative when it comes to problem solving and proficient in the generation of written reports and proposals. Experience of using MS Project would also be advantageous.

Although the position is based at Zebec's Head Office in Glasgow, flexibility to work on projects located around the UK will be necessary given the nature of the business.

In return, Zebec offers an exciting and challenging environment in which to develop and meet your maximum potential within a growth industry. If you'd like to a move to a company that will value your skills and offer you the opportunity of being a key member of the team, please forward your CV and personal statement to [info@zebecenergy.co.uk](mailto:info@zebecenergy.co.uk)

## Key Duties
